Guru Hadadi

Senior AI Engineer | Full Stack Engineering

Sydney, New South Wales, Australia

Professional summary

Senior AI Engineer with more than 10 years of software engineering experience and a full-stack background. Builds production conversational applications, document question answering, and serverless LLM systems, after years of delivering enterprise B2C and B2B products.

Experience highlights

- Cover Genius — Senior Frontend Engineer. RentalCover and XCover: frontend modernisation, user experience, accessibility, internationalisation, performance, and payment-related workflows.
- Toyota Australia — software engineering for enterprise application delivery.
- Other organisations — Ampol, ANZ, First Advantage, JP Morgan Chase, and TCS.
- ContextIQ — serverless personal AI assistant with Next.js, FastAPI, conversation memory, document upload, and Amazon Bedrock.

AI engineering

- LLM integration for conversational applications
- Retrieval-augmented generation, embeddings, and vector search
- Document question answering from extracted text, with explicit size limits
- Agentic workflows
- Serverless AI on AWS, including streamed replies and conversation memory

Full-stack engineering

- Frontend architecture, REST and GraphQL APIs, and microservices
- Legacy modernisation, performance, accessibility, and internationalisation
- CI/CD, automated testing, and observability

Tools

- AI: Amazon Bedrock, LLM APIs, RAG, embeddings, vector databases, conversational memory
- Frontend: React, Next.js, TypeScript, JavaScript, Tailwind CSS, Redux Toolkit, Storybook
- Backend: Python, FastAPI, Node.js, Express, REST APIs, GraphQL
- Cloud: AWS Lambda, API Gateway, S3, CloudFront, Docker, Kubernetes
- Delivery: GitHub Actions, Azure DevOps, CI/CD
- Testing: Playwright, Cypress, Jest
- Observability: Datadog, Sentry, ELK
